

BUILDING AGILITY THROUGH TALENT MOBILITY

STRATEGIC WORKFORCE TRANSFORMATION FOR ARVIND ~ 2025 AND BEYOND

Agility is not about speed; it's about readiness. Talent mobility makes us ready for tomorrow, today.

WHY WE MUST ACT NOW

1. Majority of our workforce in same role >3 years → skill stagnation & higher risk exposure
2. Exit Interviews / Amber feedback cited “lack of growth / career mobility”
3. Regulatory & audit risks increase when sensitive roles exceed tenure
4. Leading Indian and Multinational companies mandate structured job rotation every 2–3 years

The greatest risk is not change itself, but staying still while the world moves on.

STRATEGIC INTENT OF THIS POLICY

1. Build a future-ready, cross-functional workforce
2. Institutionalize mobility as a mandate, not a choice
3. Enhance employee experience & retention
4. De-risk operations through role rotation in sensitive functions
5. Strengthen succession & leadership pipeline

A future-ready Arvind is one where no talent stagnates and no opportunity is left untapped.

POLICY ANCHORS

1. Mandatory Movement: 3 years = trigger for rotation
 - All positions upto M2, should be closed via IJP, exceptions to be justified
 - TBD: Job rotation can be one of the criteria's for promotion eligibility
 - 1st Rotation – within the city, 2nd Rotation – across different business / different location
2. Universal Applicability: Across all businesses & functions
3. Governed by HR: Managers cannot block mobility; only CHRO/CEO can approve exceptions
4. Transparent Benefits: Appropriate financial support

Without enforced talent mobility, we risk losing agility, losing talent, and inviting risk.

ROTATION FRAMEWORK

Every move is not just a change in role, but an investment in resilience.

RELOCATION BENEFITS OVERVIEW

1. Mobility Adjustment Benefit (MAB) – Monthly allowance (12 months, time-bound), merged with CTC on completion of 1 year*
2. Settling-In Assistance (SIA) – One-time lump sum for household setup, admissions, etc
3. Support designed to make transitions fair, motivating, and seamless
4. Aligned with joining policy, structured for audit transparency

The return on mobility is measured not just in costs saved, but in leaders created and risks avoided.
